Unsatisfactory End To Bennett Shield Game

Player Interferes With Referee And Game Awarded to Redcliff

It is an old saying that "One dog barks at nothing and the rest of the dogs on the street dogs on the street bark at him."

After our reflection of the foot ball game played in Medicine Hat last Friday evening between the Legion and Redcliff in the Bennett shield competition, one is forced to the conclusion that the canine force may have some influence on the human family. There appears to be no doubt in the minds of a large percentage of the onlookers that the thoughtless, hot-headed action of the Legion goalie, who rushed down the field—followed by the crowd from both sides and the endows the primary cause of the uncalculated manner in which the game ended.

As this was the third attempt these two teams had made to decide the winners of the Bennett Shield series, and as both teams were well represented by their supporters, it was only natural that excitement would be at the highest pitch, but that is no reason why the rules, ethics and sport of the game should be cast to the four winds by any player.

Up to the point where these were forgotten, the game was one of the best of the season. Both teams were playing the game and, despite the state, it was clean. A few minutes after the game started Redcliff scored a goal. This was the only goal scored in the period. The game was well advanced in the second period when, after a hot attack by the Legion, the referee blew his whistle from off side. After the whistle blew, and after some of the Redcliff players had "ceased playing" the ball was headed into the net by a Legion forward. It was then the rumour started, "Some Legion player" was claimed it was not on off side and their goalie, running up the field, interfered with the referee. For his misdemeanor the goalie was removed off the field. When play was resumed of the goalie entered the field and kicked the ball after he was informed, the referee appealed to the Legion captain to remove the objectionable player. The captain refused so referee Patterson called the game and gave it to Redcliff. It is claimed there were twelve minutes left to play. As the Legion club had protested the game and the outcome will have to be decided by league officials, it is hard to say at the moment what that outcome will be.

It would be very unfortunate if the mix-up should in any way interfere with the friendly rivalry which has always existed between these two centres in this line of sport.

Two Good Pictures Coming to Cameo

How do people break into the movies? This question which anticipates such a large part of youthful America, receives an answer from the experience of players in "Show Folks," a Pathe picture which comes to the Cameo next Monday.

Rapid-fire action describes "Moon of the Martins," starring Richard Dix, which will be shown at the Cameo next Thursday. The story is set moving from beginning to end, packed with thrills, tense moments and laughter. Dix plays an irresponsible youngster who excites his wife's life by getting in jail. He wants to go to China because the girl "has fallen" for his going there, so he seduces the United States Marine Corps to send him there.

There is no reason why it should. Goals have been scored from inside thousands of times before under exactly the same conditions and circumstances. Players have complained and hot words have been said by them. But always the referee's decision has been final and the game went merrily on. Hot-headed players have assaulted referees before and those players have either been summarily dealt with by the referee or reported to the association officials. There surely are enough football rules, regulations and precedents to settle this matter fairly, equitably and sportsmanlike.

IN MEMORIAM
Treasurer members of a dear husband and father, Charles E. Oakland, who died in C. B. Taylor hospital, Calgary, July 21st, 1929.
"Worthy of everlasting love and remembrance." From his wife and sons, Edward and David.

Churches

ST. AMBROSE CHURCH
Rev. J. L. Cooper
9th Sunday after Trinity, July 25
Holy Communion 8 a.m.
Sunday School 10 a.m.
Morning and sermon 11 a.m.
Evening and sermon 7:30 p.m.
Thursday, Aug. 1st, W. A. devotion and business meeting 8 p.m.
Friday, Aug. 2nd, children's church meeting 8 p.m., followed by their practice.
On Sunday, Aug. 4th there will be the annual children's fever service in the church at 3 p.m.

GORDON MEMORIAL UNITED CHURCH
Rev. W. B. Smith, Pastor
10 a.m. Church School. Lesson July The story of Daniel.
11:15 Morning worship. Children's story.
7:30 evening worship. "A Meditation on the 91st Psalm." Anthem "Day is Dying in the West." This service will be held in the Church school room—cool, shady and just the place to be on Sunday evening.

The Vacation Bible School will begin Monday, Aug. 5th at 9:15 in the morning in a school for Junior Bible Missionary here and singing. The school will continue for four weeks. Children over six years of age will be welcomed. The Vacation Bible School's are becoming more popular every year. We are looking for a large enrolment on the first morning.

CHURCH OF THE BROTHERHOOD
Rev. Mr. Mulliken, Minister
ST. MARY'S CHURCH
Celebration of Mass, Second and Fourth Sundays of each month at 8:30 a.m.

Old Age Pension Act Is Now in Force

The "Old Age Pension Act" adopted at the last session of the Alberta Legislature is to take effect upon August 1st. Following an official proclamation signed by Hon. Dr. W. Robert, Lieutenant-Governor of the province, and published in the Alberta Gazette. The proclamation "Orders and declares and does hereby proclaim that after August 1st, 1929 the Act shall come into effect."

ADDITIONAL LOCALS
Mrs. T. Hicken of Taylorburg, Sask. is visiting her father, Mr. H. H. Hicken, brother and sister.
Farmers are being advised not to use any beans as feed for pigs as it spoils the quality of the pork.

J. W. Fitzhenry, of Minneapolis, is spending the week in town visiting his brother, G. W.

Mr. and Mrs. Friend Kelleys announce the engagement of their daughter, Miss Mary, to Mr. Frank Victor Britt.

Mr. and Mrs. Seal, who are on their way home from their honeymoon, stopped off here for a few days this week to visit the bride's parents, Mr. and Mrs. C. Martin.

A trio of Mongolian phoanoms from Oregon arrived in Medicine Hat for the Fish and Game Association. An effort will be made to breed these birds in this district.

A destructive fire wiped out the entire business section of Wainwright, last Sunday. Almost every store in the town was destroyed. The loss is set at \$1,200,000 with \$425,000 insurance.

The Banff Highland gathering and Scottish music festival will be held at the Banff Springs hotel from August 24th to Sept. 2nd. A good prize list for all kinds of Scotch dances, pipes and singing has been arranged.

Banff Athletic Centre of Canada

It has been decided to have the annual Labor Day for that date the 40th anniversary of Dominion track and field championships meet will be held at the beautiful resort in the Rockies. A fast 8000s quarter mile race track, built up and surrounded by a scenic view will be ready for the meet, the infield is especially prepared and ready for the meet. The Banff Highland Gathering and Scottish Music Festival will precede and coincide with the championships.

Short Session of The Town Council

A short session of the Town Council was held last Monday evening. Owing to the extremely hot weather no new business was taken up. Instructions were given to have some of the town's property renovated and it was also decided to dismantle what is known as the Robertson building on Sixth street.

Mr. Kitchen drew attention to the difficulty of securing water by residents near the tank, owing to the heavy drain on the supply during the hot weather. He recommended that these residents be given different hours for watering purposes. This was granted.

Instructions were given to have Fourth avenue graded.

Mrs. Collison, of Nelson, B. C. is the most of her sister-in-law, Mrs. G. H. Worts, this week.

U. J. Sissons left last week end for Montreal having been called there owing to the serious illness of his mother.

Mr. and Mrs. A. R. Dalrymple and George leave Friday for a month's holiday at their old home in New Brunswick.

Satisfactory progress in construction of the Buffalo branch of the C. P. R. and a possibility of early completion was announced by a head official of the company recently.

J. W. Bove, wood inspector for this district, was in town Tuesday arranging for a series of meetings with U. F. A. men. He will attend a meeting at Bowell Saturday night.

Tourists and campers are being warned to be careful of drinking water to avoid disease. At spring or lake water should be boiled or treated with chloride of lime solution before using.

FOR SALE—Springs & Malaga stone. All in good condition at reasonable prices. Apply to Mrs. Broadfoot, Redcliff Hotel.

Aquatic Sports Were A Great Success

Good Attendance And Program Is Thoroughly Enjoyed

There was a good attendance at the aquatic sports at the swimming Wednesday evening and all thoroughly enjoyed the program put on. It was a great surprise to many of those present to see what wonderful progress the youngsters have made in their swimming, diving and other stunts. Since last year, it goes without saying that all were delighted to see what a great advantage it is to have such a pool in our town.

The prizes for the different events were all donated by the business men and women of the town and they were all exceptionally good ones.

The on mittie in charge greatly appreciated the co-operation and help and wish to extend their sincere thanks. The donors were announced as each event was called off by him as he informed the audience overlooking mentioning Mrs. Hicks as giving a fine fish for the best under water swim. The following were the prize winners for swimming, diving and other stunts:

Boys' swimming race 11 and under: Ted Wolff, Sid Pearson.
Girls' swimming race, 11 and under: St. Michael's, Eva Len.
Diving for coppers—Wm. Pearson.
Boys' swimming race 15 and under: Ernie Podesta, Jim McDermott.
Girls' swimming race 15 and under: Lillian Cairns, Eleanor Straton.
Boys' diving, 11 and under: Ted Wolff, Sid Pearson.
Girls' 11 and under—Jewell Millard.
Boys' Diving, 16 yrs. and under: E. Podesta, J. McDermott.
Girls' Diving, open—Lillian Cairns.

Special for girls' swimming 12 and under: E. Leonard, E. Straton.
Boys' diving for boys 12 and under: Ted Wolff, Eva Len.
Men's water—E. Podesta, J. McDermott.
Women's water—L. Cairns, D. Mainbridge.

Diving for discs—E. Podesta, Wm. Pearson.
Best Pansy stunts—E. Podesta and J. McDermott.

Treasure hunt—J. McDermott.
Under water swim—E. Podesta, Billy Baker.
Brick race—E. Podesta, B. Podesta.

The proceeds from the event were sufficient to warrant the committee going ahead with the installing of showers in the dressing rooms. They will be put in just as soon as possible and it is expected they will be ready for use early next week.

Ferdinand Soukup has just finished painting a fine large picture of the "Immaculate Conception," which he has presented to St. Mary's Church. The work is exceptionally well done and is being greatly admired by all who see it. Ferdinand is developing into a real finished artist and we hope some day to see him rank among the very best in Canada. The picture is nicely framed in a heavy gold frame and will be hung in the church.

Brick & Coals Win From Town Team

Spill The Town Team's Chances For Winning League Trophy

Redcliff Town and the Brick & Coal football teams met here last Tuesday evening in the closing game of the league for the year. The Bricks won out by 1 goal to 0, thus spelling the Town's chances for winning the league trophy. This will now go to the Legion with three points to the goal. If the Town team had won they would have tied the Legion in the league.

Although exciting and steadily watched the exhibition of the game was not so good as some seen here this season. This was no doubt, due in part at least to the extremely warm weather. The Bricks scored their goal five minutes after the game started and, despite the fact they were playing one man short for most of the game, they maintained their lead to the finish. The Town team, behind the very prop and shortness while on the other hand the Bricks showed up to advantage along both these lines.

Towards the finish the Town showed considerable improvement and for the last ten minutes they kept up a continuous attack, but the Bricks were there with the goods on every occasion and sent them straight to their defence. All excellent work. Fairhurst and Thomson standing out prominently.

An unfortunate accident happened early in the game when Sweeney of the Bricks got a pretty gash on the cheek from one of the opponents' knees. He had to retire from the game to have the wound attended to.

Addressing the Quebec branch, Canadian Manufacturers Association annual meeting in Montreal recently, said Canada had the second largest per capita installation of water power in the world with its 515,000 h.p. per thousand of the population, but second only to Norway. During 1928-1929, \$100,000,000 was invested in hydro-power plants and there will shortly be another \$200,000,000 added by numerous undertakings now in their initial stages.

Fine progress is being made in securing the Pacific coast, according to reports in the agricultural department of the Canadian Pacific Railway at Vancouver. Last month the government had been made up, it is claimed, the soil being in excellent condition. Pastures are somewhat backward but stock are in good shape.

Under its policy of development and expansion the Canadian Pacific Railway has already this season let contracts for 244 miles of branch line construction in western Canada, according to D. C. Coleman, vice-president of western lines. It is expected that when contracts for the Laramie-Prince Albert branch are let that construction programs for 1929 will call for slightly more than 400 miles.

Hon. Alexander Macdonald, former Lieutenant-Governor of the Province of Quebec, returned from a month's trip to India and the East Indies. He was very much interested with his trip, particularly when he was in the Himalayas and the Trans-Himalayas. He was very much interested in the Himalayas and the Trans-Himalayas. He was very much interested in the Himalayas and the Trans-Himalayas.

Prairies Need Not Be Treeless

Conditions Which Destroyed Forests on Canadian Plains Have Changed

The prairies are not treeless and never have been. Trees have always been found near the lakes, rivers and hills. The existence of trees near these natural fire-breaks is a conclusive proof that prairies were of great importance in the recent past. It is one unfavorable circumstance that settlement has removed and from all appearance the forest is almost gone.

"Trees will now grow naturally on land that has been open prairie for unknown lengths of years. Some great change has taken place on the Canadian plains. That it is the weather is at least doubtful, for the weather is one of the few things that the white man cannot improve or change."

When a forester is asked to explain the treeless prairie he usually talks scientifically about light, precipitation, cold winters and winds, and situations. Yet an enormous forest belt south of Lake Superior receives no more rain than the driest parts of the prairies. The cold winter temperatures and winds of Northern Siberia drive the forests from growing far north of the Canadian limits of tree growth. For the altitudes, there are no forests near Winnipeg has an elevation of only seven hundred feet.

It is true that the absence of the prairie makes reproduction uncertain and growth slow, yet it does not by any means preclude the possibility of forests. There are no extensive areas in Canada where the climate is so dry as to prevent trees from growing. In an area where the climate will allow trees to establish themselves and where no forests exist, there must be other very important factors at work. The changing appearance of the prairies indicates that these unfavorable influences have been removed.

One hundred thousand shelterbelts and hundreds of naturally established windbreaks have been planted. Trees can and will grow on the prairie. The practical extinction of the buffalo and the disappearance of prairie fires seem to have upset the balance of forces which have kept the prairie free from trees. In the past if this is true it will be one of the few instances where settlement has actually encouraged the establishment of new woodlands. Even if all attempts at tree-planting were to stop, it seems very probable that the unused lands of the prairie would be taken over by extensive areas of poplar.

Oldest and Youngest

Ireland's Parliament a Thousand and Kith's Eleven Years Old

The Parliament of Ireland known as the "Athlone" is planning to celebrate its millenary (one thousandth) birthday. We are so accustomed to the "Look-on-You" in the London Daily Chronicle, to thinking of one as the Mother of Parliaments that it is hard to believe that the national convocation is something of a humbling school. On the other hand, there are some youngsters of Parliaments that have not yet attained their majority. Among them is that of Kithonia, which the War was responsible for creating, and which is this week just eleven years old.

Bachelors Take Notice

A Berlin physician has investigated stomach ailments and has found that unmarried people between the ages of 20 and 50 suffer more from dyspepsia than the married people of the same age. Unmarried people, the physician finds, have the tendency to beat their meals, causing indigestion. The married people take their time in eating.

He: If you refuse me I shall never love you.
She: Will that be true if I accept you?

"Drunk again!"
"No, an' I'm—Sunday-mornin'—Stirrin' Blackie."

W. N. U. 1792

Builds Up Fine Business

American Woman Succeeded With Sheep Ranching In B.C.

A visitor to the sheep range of Mr. and Mrs. Robert Hever, of Cherry Creek, near Kamloops says:

Mrs. Hever is an American-born woman full of vigor, optimism and energy, and knows pretty nearly as much about the practical side of sheep raising as the ranchmen. She has her way of approaching the sheep question in British Columbia, an interesting combination of feminine indirection and that intuition which is currently believed to endow her sex with a sixth sense.

"I want some fine motion chaps," she said to the butcher at Penitence on a certain day four years ago. "You will not find such a thing in town, madam," he said. "This is no country for sheep, and for that matter not much else, either." She had been very unlucky in striking a born pessimist who has since passed out of the ranks of mercantile endeavor in the region of Cherry Creek.

"My, but that man was sure tearing down Canada. Yet, there was I, new arrival from the States, who was actually the opposite feeling. For one thing, I like the roads in Canada. They have good bottoms, which make something to people like us who were contemplating driving our big flock all the way from Washington."

"Less than four years ago, we drove our 3,500 sheep from Peterborough, Ontario, across the Canadian border to Penitence, B.C. From there we shipped them by rail to Kamloops and drove them to Cherry Creek. We reached Kamloops on October 14, 1925, in a snowstorm. The welcome we received was the exact opposite of the weather. Nothing could have been more cordial, warm or helpful. The 'Yahvala' ranchmen were anxious to assist us to get settled. There were others of service in that direction. Since then, we have worked hard, but we have been very happy and have prospered from the start."

Live Stock Protection

Cattle Diseases Kept Out Of Canada By The Vigilance Of The Department Of Agriculture

Canada is fortunate in having escaped many of the diseases of live stock which in other lands have inflicted great losses and even rendered this part of agriculture precarious. Three diseases, quite common everywhere, which are dreaded by live stock men, have never invaded Canadian herds and flocks. These diseases are cattle plague, contagious pleuro-pneumonia, and foot-and-mouth disease. Two outbreaks of the last-named of these occurring in the past decade during the past decade or so, cost many millions of dollars in losses and measures taken for its eradication. These and other epidemic diseases are kept out of Canada through the vigilance of the Department of Agriculture at Ottawa.

The administration of "The Animal Contagious Diseases Act," which permits the admission of live stock into Canada, is a task not without its difficulties. It is often accompanied by official certificates of health. In the case of cattle, sheep and pigs, the animals are held under supervision at quarantine stations for a sufficient length of time to give assurance of their freedom from disease.

Care In Selection Of Children's Toys

Is One Of First Steps In Prevention Of Blindness

Greater care must be exercised by parents in the choice of children's toys. C. E. A. Baker, general secretary of the Canadian National Institute for the Blind, declared at the annual meeting of the council in Toronto.

"This is one of the first steps in the prevention of blindness," he said. "Sharp-pointed toys often are thoughtlessly presented by adults to small children and blindness results. Just a few months ago a woman came to my office with a 5-year-old child who had an eye while playing with a bow and arrow. The physician had but an eye when playing with another sharp-pointed toy."

Products Of Our Coastal Fisheries Haddock is a staple product of Canada's coastal fisheries. During the spring and summer it is split and salted but the important season comes with the autumn, when the fish are shipped fresh or else smoked and sold as flounders.

In Norway a law forbids anyone to use a line unless he plants three saplings in its place.

"You do they all keep you?"
"Yes, you got to keep on the jump."

Appointed Director

Volume In British Museum Show Work Done During Last Ten Years

Among the countless millions of books on the shelves of the library at the British Museum, are about 200 volumes which contain the same of the printer's art. They form an exhibition of books illustrating the most beautiful and expensive British and foreign printing during the last ten years. Centuries-old Chinese manuscripts and illuminated books, from the Monasteries of medieval Europe are exhibited in the same room as these masterpieces of modern printing which has attracted the attention of printers whose names are famous among book collectors in the two hemispheres. Books from the leading presses of England, Scotland, the United States, France, Germany, Holland, Spain, Italy, Poland and Belgium are included in the collection. They have all been printed within the last ten years, and except for one volume, the art of the printer has greatly improved since the opening of the twentieth century.

C. T. Jeffery, President of the Soo Line, Minneapolis, who has been appointed a Director of the Canada Colonization Association, subsidiary of the Department of Colonization and Development, Canadian Pacific Railway.

Developing Rust Resistant Wheats

Important Problem In Receiving Attention Of Department Of Agriculture

The ideal wheat of the future is the wheat for enormous losses to farmers in the Prairie Provinces of Canada every year. A sum of no less than \$200,000,000 was estimated as the loss suffered through this cause in one of the worst years. This state of affairs is leading the plant breeders to endeavor to develop resistant varieties that possess the merits of the best wheat grown. The Department of Agriculture, through the Botanical and Cereal Divisions, has for years been working on this problem and is following a well defined line of work which is being carried at the Rust Research Laboratory in the West and at the Central Farm at Ottawa.

Dustless Coal

Treatment For Making Cleaner and Healthier Coal Is Discovered

The advent of dustless coal both antirustic and bituminous was depicted to the 25th Canadian delegates as well as anthracite producers from the United States attending the 25th annual convention of Canadian Fuel Coal Dealers' Association, in Toronto.

J. W. Hackett, Petrolia, told the convention that a treatment for making "cleaner and healthier coal" had been discovered four years ago, but it was not until last January that a successful system of application had been perfected. The coal is made dustless by the application of a treatment of water mixed with a variety of chemicals.

Fuzzed By Order

An order from Vancouver, B.C., for a thousand live rabbits from the South Wales in order to establish a rabbit fur and carcass industry in the Dominion, has puzzled prominent New South Wales stockmen. The rabbits had proved a menace in Australia, they declared. "We only wish we were commissioned to ship a million of them," said one.

Remembered His Manners? Gamekeeper: "Now, then, didn't you see that board when you came responding in these words?"

Tramp: "Well, what did it say?"

Gamekeeper: "Dunno, sir! I was too perlit to read more when I saw the first word was 'Private'!"

Tramp: "Dunno, sir! I was too perlit to read more when I saw the first word was 'Private'!"

Hold Job Fifty Years

New York Man, 89, Still Giving Valuable Service

Every man ever stay with one job fifty years, especially if they take it at 29.

That is the happy lot of George F. Baker, however, who became a trustee of the Mutual Life Insurance Co. of New York, a great age and who still holds the position.

Though 89, he does not miss many meetings of the board, nor are his faculties so impaired that he cannot render valuable service.

It used to be believed that men could only live long by shunning responsibility and pursuing a narrow, self-centred existence. If this age has proved nothing else it has proved the folly of such a theory.

D. B. Rockwell, 88, of Cincinnati, 88, Edison St., Van Houten, 82. They have all known the meaning of care and hard work.

Town Changes Name

Sussex, Seashore Town, Where the King Resided Is Now "Bognor Regis"

Bognor, a seaside town in Sussex, just obtained from the King permission to change its name to Bognor Regis, as a perpetual commemoration of His Majesty's long stay at Craigville House, just outside the town, while recovering from his serious illness of last winter.

A number of other towns throughout the kingdom also bear the affix indicative of some special connection with royalty at some time in their history.

Record Is Broken

All electric records for the month of registration of new aircraft in Canada, were broken, during May, with the official listing of 52 additional private and commercial planes. A fifty per cent. increase in flying activity was registered over the previous twelve months.

Employer: "I'm looking for a man with new ideas."
Apprentice: "Believe me, I've got them. I was just married, last week."

Mr. Hankins: "What makes Jones so valuable to his firm?"
Mr. Shankle: "He collects money; they haven't got from persons who cannot pay."

Tramp: "Dunno, sir! I was too perlit to read more when I saw the first word was 'Private'!"

Early British Parliament

Were Essential Part Of Members Had Women Members

Many people imagine that Lady Astor was the first woman to sit in a British Parliament, but in the middle part of the deliberative assemblies, such as "Cortesia." In the reign of Edward I, for example, the Abbot of Shaftesbury, Belling, St. Mary of Winchester, and of Wilton, were summoned to Westminster, while in the reign of Edward III, a number of women of high degree, including Mary, Countess of Norfolk, Abbot Countess of Ormond, Anne Despoeur, Countess of Pembroke and Matilda, Countess of Oxford, were members of the National Council, and they seem to have made their presence felt just as potently as do the women members of the House of Commons today.

Ladies at one time during the eighteenth century had admission not only to the public galleries, but actually to the sacred floor of the House itself, where they would sometimes sit by the side of members. The ultimate abandonment of this privilege, however, was a gradual process. It came about through a display of frustration on the part of the House itself, where they would sometimes sit by the side of members. The ultimate abandonment of this privilege, however, was a gradual process. It came about through a display of frustration on the part of the House itself, where they would sometimes sit by the side of members. Edmonton Postman Had Long Crop Of Turkish Tobacco Last Year

Report of the Turkish tobacco plantations of Essex County, Ont., that a crop of six farmers were about to experiment with the Turkish variety of tobacco, is of no great importance. It is an effort to see whether it could be grown in Canada, in light of the fact that it has been.

"Not only has the Astoria brand tobacco been brought in from the Canadian soil, but it has been successfully achieved in Edmonton, which, as such things go, is no great distance from the Arctic, and a heavily not usually associated with the development of Oriental tobacco."

Martin Balch, an Edmonton postman, has made a hobby of tobacco growing since shortly after the war and since 1918, has been producing the Turkish plants on a gradually increasing scale till his annual crop has now reached the commercial stage.

During the war, Baker, originally an Armenian, led now a naturalized Canadian, served with the Royal Engineers and was sent to Salonika. While in that general district, he was generally believed to be a mind the weeks he had spent in similar surroundings during his boyhood. When he returned to Canada, he turned to western Canada at the cessation of hostilities, to tackle the tobacco problem in northern Alberta even though he knew he would be told that it was an impossibility in such a cold climate.

But his tobacco grew rapidly and, in his experiments on vacant land within the city limits. They were watched with great interest, since the postman-planter was pioneering, and it was generally believed that his chances of success were slim.

Early British Parliament

Were Essential Part Of Members Had Women Members

Many people imagine that Lady Astor was the first woman to sit in a British Parliament, but in the middle part of the deliberative assemblies, such as "Cortesia." In the reign of Edward I, for example, the Abbot of Shaftesbury, Belling, St. Mary of Winchester, and of Wilton, were summoned to Westminster, while in the reign of Edward III, a number of women of high degree, including Mary, Countess of Norfolk, Abbot Countess of Ormond, Anne Despoeur, Countess of Pembroke and Matilda, Countess of Oxford, were members of the National Council, and they seem to have made their presence felt just as potently as do the women members of the House of Commons today.

Ladies at one time during the eighteenth century had admission not only to the public galleries, but actually to the sacred floor of the House itself, where they would sometimes sit by the side of members. The ultimate abandonment of this privilege, however, was a gradual process. WORLD HAPPENINGS
BRIEFLY TOLD

Director Blumert of the Zeppelin works has gone to Tokyo to prepare for the arrival of the first Zeppelin there on its cruise around the world.

A participant in both Red rebellions, George Buchanan, 62, who came to the West coast to head the Red River expedition under Sir Garnet Wolsey, is dead at his home in Winnipeg.

England and Wales have increased in population by 44,112 persons in the first quarter of this year which, when compared to the same period of 1928, is causing some alarm.

Hon. Mr. Justice Riddell, Toronto, was elected president of the Canadian Social Hygiene Council at the annual meeting in Montreal. Judge Emily Murphy, Edmonton, and Dr. E. Young, Victoria, B.C., were appointed vice-presidents.

The great appeal flying has for the university student movement in the department of national defence receiving more applications for its course at Camp Borden than it has facilities to accommodate. The new class will have forty students.

Prof. C. Macintosh, a native of Canada and professor of chemistry at Yale University School, who would not promise to defend the United States against all enemies, was denied American citizenship by Federal Judge Warren.

Frank G. J. McDonagh, of Toronto, was elected president of the Canadian Penitentiary Association at the fourth annual meeting of the association there. A large increase in membership was reported from Ontario and British Columbia.

Arthur Thomas, 19-year-old band leader who held up the Grandview branch of the bank of Canada at Vancouver, escaping with some four thousand dollars, was mentioned in police court today by Magistrate H. C. Shaw to five years in the penitentiary and ten lashes.

If the organized system of cattle rustling by truck is not checked immediately, Saskatchewan ranchers and stockmen of the entire west will be great losers, according to delegates in attendance at the seventeenth annual convention of the Saskatchewan Cattle Growers' Association, at Swift Current.

Plans To Canoe Down the Fraser

Young German Journalist To Commence Adventurous Canoe Trip

In the track of the great explorers of the first white men to lay eyes on the Pacific coast, a young German journalist is about to start an adventurous canoe journey down the Fraser and the Thompson Rivers to Vancouver. Arriving in Jasper from Edmonton where he took a preliminary canoe trip, he is planning to travel down the Skeena River, Caribou, of Munich, will leave for Mount Robson. He will take to the water at Blue River, returning to Jasper by train. Schwela plans to explore the Athabasca and Maligne Lakes. The young adventurer, who has written a number of books on outdoor subjects, is also a lecturer of prominence in Germany both by radio and from the platform and has written and produced movie scenarios of river and lake travel. By movie and still photograph and by the written and the spoken word, he will carry Canada back to Europe. His canoe is a folding one weighing only 30 pounds and easily carried on a man's back. "He" is modelled after the Eskimo kayaks.

Mexican Jumping Bean

The Mexican jumping bean does so because of a little worm inside which eats itself and sets the bean to go like a catapult, carrying its house along with it. The worm lives in the bean all the time, and if a hole is made in the shell, it will fly up again.

Canadian Amateur
Golf Championship

Entries Restricted To Players With Handicaps Of Ten and Below August 1

Entries for the Canadian Amateur Golf Championship to be played over the Jasper Park Lodge Course, Jasper, Alberta, August 19 to 24, will close on August 1, according to announcement made by C. E. Harvey, president of the R.C.G.A. Positively no entries will be accepted after that date. Mr. Harvey said it will be necessary for those desiring to play to have their entries in the hands of B. L. Anderson, secretary of the R.C.G.A., Hamilton, Ont., before August 1.

Players entering the Canadian championship must have a certified handicap of ten or less. Figuring on this basis, it is believed that about 100 players will tee off in the qualifying round of the major event at Jasper in August, the figures being arrived at as follows: Eastern Canada, 50; Manitoba, 15; Saskatchewan, 10; Alberta, 20; and the United States, 15.

A much larger entry list is expected for the Western Canadian Amateur Championship which will be played over the Jasper course at the same time. This event is open to players with a registered handicap of 16 or less. Entries for this event should be in the hands of Innes Mackenzie, Winnipeg, secretary of the Western Canadian Golf Association, not later than August 14, though in special circumstances post entries will be accepted at Jasper.

WHERE WIVES MEN LIVE

This little Red Cross Outpost at Pouce-Coupe, in the Far North, is the pride of the Province of Alberta. Situated 489 miles north-west of Edmonton, it is 89 miles from the end of the road.

Formerly the buffalo and Indian held sway, but today the Pouce-Coupe are establishing themselves in splendid settlements, forging ahead with a spirit of civilization that does honour to the pioneer "Fighting Fathers" of their ancestry.

Thanks to the Red Cross vision and extension service, this district is no longer a place where Red men idle, but where "White Men Live," for the beneficent arms of the Great Mother embraces six settlements in an area of three hundred miles.

Holds Important Office

British's First Woman Cabinet Minister Fitted For Position

Miss Margaret Bondfield has been given an important office in the Labor Government. She is Minister of Labor and the first woman to hold Cabinet rank in any British administration. She is also a member of the Privy Council.

Miss Bondfield is a former president of the Trades Union Congress and was one of the prominent personalities at Washington when the International Labor Conference was held there.

A valuable report on child migration to Canada was produced by Miss Bondfield in 1924. She was parliamentary secretary of the department she now heads.

Once, when bidding farewell to a party of domestic going to Australia, Miss Bondfield told them the mistress of the house had a right to expect a "good honest day's work."

The appointment to Cabinet rank of Miss Margaret Grace Bondfield is of particular interest to Canadians who remember her visit to Canada in January, 1927.

She was first elected to Parliament by Northampton, which she represented in 1923-24. She has served a thorough apprenticeship for present Cabinet position, having been parliamentary secretary to the Ministry of Labor in the MacDonald Government in 1924. She was the successful parliamentary candidate in Walsland in 1926.

Canada's Newspaper

Canada led all other countries of the world by a wide margin in the production and export of newspapers during 1928, according to the figures of the News Print, Service Bureau. Dominion production in that year amounted to 2,381,000 tons, this representing one-third of the world's total output, while Canadian exports amounted to 2,207,000 tons, a volume equal to those of all other countries put together.

Weather maps can be transmitted to ships at sea with a new radio sounding device invented by a Washington man.

Song of Thanksgiving

The following song, "Omnitude," words by W. E. Dyer and tune suggestion by Dr. J. MacMillan, is an empty song of thanksgiving for returning health to his Majesty the King.

WINCHESTER, G. N. C. d. e. f.

My dear, which would you prefer in a husband, wealth, position or appearance?

"Oh, appearance by all means, and I want him to appear pretty soon, too."

Traveller: "You have a wonderful crop of peaches this year. What do you do with them you can't use?"

Hotel Manager: "The reason we can't use them."

Traveller: "We adopt the same principle with our orders. What we can't sell we cancel."

Traveller: "The poor we have ever with us."

"Yes; and aren't their lives a nuisance?"

A platinium wire has been made with a diameter of only one-thirtieth of an inch.

Air Routes For Alberta

Three Air Lines To Be Established Very Shortly

Establishment of three main Alberta air routes by early next year, one leading east from Cammore to Montreal, one north from Edmonton to the Mackenzie River, and one south from either Calgary or Edmonton to Seattle, on the international border, are the chief proposals at Ottawa in the near future, emphasized by H. B. Adhead, member for East Calgary, on his return to the city.

The matter of the air mail routes Mr. Adhead stated, had taken up a considerable amount of time. The question of award of the contract for the East and West routes, he said, was still undecided, but he claimed the amalgamation of three Western aviation companies into one concern under the heading of the Great Western Airways, Limited, of Calgary, had simplified matters considerably. He said that the Government was looking for a split in the main contract. "The split, if it takes place," he said, "will make it necessary for one company to operate from the East to Regina, and for another company to operate from Regina to the West."

As soon as the matter of the mail routes across the continent as far as Cammore had been decided, he continued, the government would in all probability take up the establishment of routes North and South. These, he pointed out, would converge on Southern Alberta.

Similar action, moreover, Mr. Adhead stated, it was very possible that everything would be ready for establishment of the final link in the Alberta to Pacific air mail service, the route over the Rockies to Vancouver. Although a recent press notice had implied that this route would be from Edmonton, by way of Jasper Park, Mr. Adhead stated emphatically that the Government was not to be reached by the government, and that a survey by the Department of Civil Aviation would take place during the summer. A number of letters to him, he mentioned, had stated to him that they favored the route from Calgary via Crow's Nest.

The Vimy Monument

Credited With Being the Finest of Any in the Battlefield Area

"The Vimy monument is the finest of any that the battlefields have seen," said Mr. Herbert Marler, Canadian envoy to Japan, upon his return to Ottawa, from a European tour. Marler, who is sailing for Tokyo from Vancouver on August 29, aboard the "Empress of France," was in England last week on business matters and while there was received by the Prince of Wales. The Prince said Mr. Marler, who showed himself to be well informed on the Canadian conditions, and asked a number of questions about the Dominion.

"After spending some little time in England, I went to France, where I visited the battlefields. Among the host of monuments that have been erected those of Canada are the best. The Vimy monument is the finest of any in the battle area. On it are sculptured the names of 11,000 Canadians who fell at Vimy," he said.

"It is the universal language," "And where is it spoken?" "Nowhere."

A police's bill will hold several quarts.

Of Drink Evil

President Gil Inaugurates Campaign To Restrict Sale Of Intoxicants

President Porfirio Gil's campaign to restrict the sale of intoxicants has gained a new impetus. It has become one of the chief topics of discussion throughout the country and one of the principal subjects of legislation.

The president's appeal to state governments to second his endeavor has met with ready response in the form of orders restricting the sale and consequently consumption of alcoholic liquors, as well as regulating the number of saloons.

Governor Raymundo Bonifacio, of Chiapas, has instructed the state treasurer to establish so heavy a tax on intoxicating drinks that their manufacture will be unprofitable. This measure, in addition to discouraging manufacture of liquor, is calculated to obligate the saloons to charge prices beyond the reach of the average man.

Governor Enriquez also has ordered governments to second his endeavor. Increased taxes, hoping through this means to cause many of them to close.

A Woman's Pride

The useful pride which makes woman careful of her appearance and complexion finds a help in the purity and delicate clinging fragrance of

BABY'S OWN SOAP

The Singing Fool

By HUBERT GAIL
Copyright 1932, Warner Bros. Pictures, Inc.

SYNOPSIS

As gray dawn creeps over the New York skyscrapers, Marcus, the famous revue producer, leaves the fashionable Plaza night club with a party of four. As actress companion, suggested that they go to Blackie Joe's club, where the "run is just starting," and Marcus consents. At Blackie's shabby club the newcomers are seated on a "vice side table" by Al Stone, Blackie's head singing waiter. The pretty cigarette girl, catches the name "Marcus", and knows he celebrated producer will do something to help Al, whom she admires tremendously.

CHAPTER II

As Al hurried toward the door leading to the bar, Grace speculated as to whether she could get in and intercept him. But he was moving too fast and there were too many tables in between. She decides to wait until he returned, then she would drop a word as to Marcus' identity. It was necessary for Al to know that, so he could try everything possible into the comic songs he would sing in a few moments.

Grace's sensitive young face was a study in devotion. Al Stone had been her best friend at Blackie's place. When she had taken the job as a cigarette girl a few months before, the crowds, waiters, bartenders and performers frightened her, the rough-and-ready atmosphere of the place made her timidly draw into herself. Then it was that Al had put his hand kindly on her shoulder and looked down into her apprehensive brown eyes.

"Don't be scared, kid. Everybody's all right here."

Two minutes later, Al had forgotten his words, but Grace remembered them and knew them by heart. She had promptly fallen in love with him. Al did not know this, so he could say, "They were neither graceful nor beautiful."

Marcus, the producer, the comeliness of femininity, the despot who treated only the loveliest girls for his revues and rehearsed them from minutes until they were step-perfect—Marcus made no attempt to hide his disdain at this apology for entertainment. Grace saw him turn to the pretty actress at his table with a bored look that said only too plainly: "So this is what you brought me to see!"

Then Grace heard a voice behind her, a rough masculine voice.

"Hey, cigarette girl, come here."

Sheaving away and carried her heaving tray of cigars and cigarettes to a nearby table. Three men, heavy-eyed and uncertain of speech, looked up into her face.

Had Diarrhoea Bowels So Active Feared For His Life

Mrs. M. J. Jago, Canby, N.B., writes:—My little boy, when three years old, had a severe attack of diarrhoea. The bowels were active, and he vomited so much, I feared for his life. I tried many things, but he was always getting worse. A friend told me of

and after the second dose I saw an improvement. I gave him another and my little boy was completely relieved.

"I have used it for the other children in my family and my husband and myself. My children give it great praise, and when he goes away from home to work he always takes a box with him."

Get only by The T. Millers Co., Ltd., Toronto, Ont.

W. H. U. 1792

"Want some—cigs—cigarettes," said one of them.

Grace lowered her tray for this patron to make a selection and, as she did so, became aware that one of his companions had drawn his chair closer to her.

"Say, you're a nice kid," suggested the second man, with a rapid expression on his face. "Do you know you're cute. I 'I seen watchin' you."

Grace smiled faintly, but ignored him, however, while she passed out the cigarettes to the first customer. That was what Blackie and Al had told her to do when the patrons became personal in their remarks—say nothing and attend to business.

As she leaned across the table to hand another pack of cigarettes to the third man of the party her skirts rose a trifle. Without looking she knew that one of the customers was looking up and down. Then suddenly she felt her other hand in his tightening grasp.

She straightened up sharply and tried to draw away. She knew she mustn't make a scene, for after all, there was only a night club cigarette girl, and the customers must be ignored a little.

At this moment, Al Stone, just about to turn the corner to the door leading to the bar, shot a glance across the room and visualized Grace's predicament in a flash. In a moment he had veered across, while Grace gazed beseechingly into his unken man's eyes and murmured, "Please let go."

Then Al loomed at her side and stepped sharply on the man's foot. The cry of pain came from the customer and he released Grace to seize his aching toe. The girl caught Al's hand and made good her escape, while the three unsteady Don Juan stood up in bewilderment at Al's brazen grin.

"Why did you step on my foot?"

"Did I do that? I'm sorry."

Again the broad, but guileless grin from Al. Then he moved off, swiftly as he had come.

But now he felt a hand lightly on his sleeve and looked down into Grace's wild eyes.

"Thank you, Al," she murmured. The waiter patted her on the shoulder. "It's all right, Grace. Kid. Those things will happen. If they bother you again let me know."

Al glanced down at the diminutive Grace and his handsome face softened, as it always did when he reassured her. But in the tenderness of his smile was only the gratefulness of someone he considered merely a sweet child. To him the marked evidence of acceleration in her breathing and the faint tremor of her warm and lovely little hands were only her reactions to fright. He did not see her head turn, as he moved away, while her eyes followed him adoringly.

Not until he disappeared and the throb of her heart swung back to normal did Grace recall that she had a message for him. But when the singing waiter reappeared with his four beers on a tray he did not hand straight across the bar to her. Instead he paused in the barroom entrance and glance down at a corridor. Through an open doorway he saw a good-looking blond girl, a few years older than Grace, seated before a mirror in a tiny dressing room. She was studying her reflection in a self-satisfied way, as she slowly and rhythmically brushed her lustrous golden hair. This was Molly Winston, the ballad singer at Blackie Joe's.

Al moved slowly toward the door as if drawn by a magnet, forgetting his order for a moment. His eyes lit up at the sight of Molly and with fascinated gaze he watched her white, rounded, raised ears protruding from her pink silk dressing gown as she slowly manipulated the hairbrush.

Molly was undoubtedly a pretty girl and one of the favorites at Blackie Joe's. Yet there was a hardness about her eyes and a petulance discernible at the corners of her mouth that boded no good for the man who would fall in love with her. However, she was blind to these defects.

As he neared her dressing room door she saw him, gave him one in different glance, then turned to the mirror again to rouse her shapely hair. It is the moment of a woman's reflection Molly, the heart-song specialist, was gazing at the person she loved best!

(To Be Continued.)

Slitaneous Plagues Cross

The landing of the French moped "Yellow Bird" in Spain brought to a total of 16 the number of times the Atlantic Ocean, north and south, has been crossed by heavier-than-air machines. It might have made the crossing five times.

The world uses eight matches per day per inhabitant.

Old London Church

Sanctuary Made Famous By Chas. Dickens Is In Danger Of Crumbling

The church of St. George-the-Martyr, immortalized in "Little Nell" by Dickens, as "Little Dorrit's Church," is in danger of crumbling. All London knows St. George as "Little Dorrit's."

Omibus cracks, many feet long have appeared in the walls and crypt. These are gradually widening until now the whole structure has been placed in danger.

The authorities have threatened to condemn the building unless prompt action is taken to make it safe. The rector of the church has started a drive for \$25,000 for repairs to save it.

"Little Dorrit's Church" was built in 1736, and was given its popular nickname because one of Dickens' characters often slept in the vestry of the church register as her pillow.

Upon the site of St. George-the-Martyr stood another church dating back to 1122 in the time of the Saxons. It is the earliest if not the oldest church in London.

Service For Plane Passengers

May Revolve Market Reports and Musical Programs Is Prediction Aeroplane passengers of the future may expect to listen regularly to market reports, baseball scores, and musical programs, if the prediction of W. P. McCracken, Jr., of developments in the aviation commerce for aeronomics, comes true.

"These programs could be tuned in right now, for that matter," Mr. McCracken indicates. "In favorable weather the pilot of a properly equipped plane has no need of his radio apparatus."

McCracken predicts that great developments will be made along the line of radio transmission from ground to plane and from plane to ground.

DO NOT NEGLECT YOUR LITTLE ONES

At no time of life is delay or neglect more serious than at childhood. The little ones come quickly before the mother realizes the baby is ill. The prudent mother always keeps a supply of Baby's Own Tablets as a safeguard against the sudden onset of illness. Hundreds of mothers have found, through experience, that there is no other medicine to equal Baby's Own Tablets and that it is why they always keep a box handy. Why they always feel safe with the Tablets.

Baby's Own Tablets are a mild but powerful laxative which by regulating the bowels and the fast removal of constipation and indigestion; break the cold and the fever. They are gentle, healthy, natural sleep. Constipation, colic, and the like. Eugene, Ont., writes:—"I have been using Baby's Own Tablets ever since my baby was a month old and have found that they reach the spot and do more good than any other medicine I have ever tried. I always keep a box of Baby's Own Tablets and advise all other mothers to do so. The Tablets are sold by medicine dealers or by mail at 26 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont."

Why Shouldn't He

Albion Lyman, the Hollywood jinx bandman, who is playing at the Kit Kat Club, in London, England, recently journeyed up to Scotland for the week-end. Returning from Glasgow to London, Lyman had as a travelling companion in his compartment a rather close-mouthed, middle-aged Scotchman. After an interminable number of stops at various stations, he found his seat looking more dour and solemn than ever.

"It's a long, wearisome journey," remarked Lyman, by way of making conversation.

The Scotchman looked at him with an angry frown.

"No right to be," he replied frigidly. "It cost fifty-nine shillings, nine pence!"

Whether the corn be of old or new growth, it must yield to Holloway's Corn Remover.

Evening Up Balance

United States is growing fast on the manufacture of Canada's raw materials. Since United States will not accept a reciprocity of trade, Canada will have to retain some of that fat within her own boundaries by placing embargoes on these raw materials that will enforce their manufacture within the Dominion, and by establishing a reciprocity of trade that will even up the trade balance between the two.

To Capture Cup

Sir Thomas Lipton To Make Another Effort To Win International Hobnobs

"I'm going to do my damndest to bring the cup back," Sir Thomas Lipton said in the first interview he has granted since acceptance of the challenge to another international yacht race in 1930.

On the veranda of his mansion at Southsea, Sir Thomas appeared vigorous and healthy, despite the fact that he will be celebrating his 80th birthday at the time when the yachts are racing off Newport a year from next September.

"Do I think I can win the cup this time?" repeated the veteran sportsman, pondering for a moment. "Well, I am going to do my damndest. I hope and trust we will have good luck. To bring back the cup would be one of the greatest pleasures of my life."

Col. Duncan, Sir Thomas' racing manager, said that the Shamrock V, the challenging yacht, would not be from the West, and expressed the opinion that the rules for the 1930 race as outlined from New York bettered the chances of the challenger.

For Both House and Stable.—There is a good deal of similarity, physically speaking, between human beings and the lower animals. Both are subject to many ailments arising from inflammation and to all manner of cuts and bruises. Dr. Thomas' Electric Oil is an entirely reliable remedy for such ailments and rubs in both human beings and the lower orders of animals.

Cowgirl Outfit For Jeritta

California Man Says Opera Star Did Not Look The Part

The star of the Vienna Opera, Mme. Jeritta, received the other day a large parcel from California which revealed when opened a complete outfit, complete with saddle and bridle. The sender, a Mr. Schweppes, of Los Angeles, explained in an accompanying letter that he is making this gift to Mme. Jeritta because, when on a visit to Vienna, he saw the opera "The Girl Of The Golden West" and was much pleased to find that Mme. Jeritta, an leading lady, had the slightest idea what a "Girl Of The Golden West" really looks like.

Small But Efficient

A small electrical instrument, four inches across and not seven inches high, will, it is claimed, detect an escape of only 14 per cent of gas in any tunnel or inspection chamber. When the escape occurs this instrument warns the nearest telephone exchange.

Bicycle Boats Are Latest

Have Become More Popular Than Swimming Channel

Bicycle-boating across the Channel has replaced swimming in popularity. Three athletes have already succeeded in crossing, so far this year. The latest was a woman, Miss Alice Plummer, who pedaled her way over on a nautical bicycle in 9 hrs. 10 mins. She was so worn by the effort that she fainted as she got off her seat.

The bicycles are fitted to two long-pointed pontoons and the pedals are attached to paddlewheel propellers. The one-piece makes about five miles an hour, but currents bother Channel bikers.

Many mothers have reason to bless Mother Graves' Worm Exterminator. It has relieved the little ones of suffering and made them healthy.

Write: "Can you let me have a little more?" Hubby: "Sure, as little as you like!"

Maples build large strong nests which they use for several years.

"My daughter is about to be married and I want to get her a nice gift," said a prosperous-looking man who entered a house furnishing store, adding: "Let me see your nutmeg graters!"

Keep Foods Deliciously Fresh
